

▼ Rubén Sospedra

Barcelona-based engineer with a Political Science background and a lifelong passion for automation. 13+ years in the game. I started by founding a remote startup, then moved through teams of every size. I thrive on complex problems. I ship at the highest standard and build for growth. AI is a multiplier in my toolkit, not a crutch. I give back through open source, conferences, and mentoring. Knowing when to move fast and when to get it right is the skill behind every other skill. Great software lives at the intersection of ambition and pragmatism.

Education

Associate
in Computer Science
LaSalle Gràcia
2013

Bachelor's
in Political Science
Universitat de Barcelona
2013

Highlighted Experience

Principal engineer Digg, July 2025 ▶ present

Led the mobile platform from concept to release, shipping a cross-platform app with 4.8+ store ratings.

Architected and shipped the most complex client systems, including a composable rich text editor and a complete video feature delivered end to end in two weeks.

Built mobile CI/CD pipelines and worked across every stack layer, leveraging AI as a core tool to ship polished experiences faster.

Skills

typescript, rust, ruby,
react, react-native node.js,
next.js, swift, kotlin
postgre, mongodb, redis,
devops, prompt
engineering, RAG, LLM
integration, AI agents

Staff engineer Cameo, Oct 2019 ▶ July 2025

Architected and engineer highly-maintainable native apps with +10k WAU.

Led a quality overhaul of the iOS app, elevating it to App Store feature standards and securing a showcase spot at WWDC.

Led and developed community-driven platforms from ideation to profit. Implemented devops systems that accelerated cycles by 400%.

Achievements

Public speaker
Technical writer
OSS contributor
Mentor
Part-time lecturer in
college

Lead software engineer FreeNOW, Mar 2018 ▶ Oct 2019

Engineered internal tools that drove 10x user growth and supported global expansion.

Architected a driver registration flow that halved overhead and raised retention 5x.

Delivered responsive, regulation-compliant apps across complex legal standards.
